

### **Who we are**

100 Go Solar is Byron's brighter business challenge - a community initiative supported by Byron Shire Council, Green Building Centre and the NSW Office of Environment & Heritage. It was launched on 5 June this year.

### **What and how are we doing it?**

We encourage business to go solar through 3 easy steps, with recommended local suppliers, installers and finance listed on our website or we can provide advice and guidance. Since June, 14 businesses have installed over 110kW; we're aiming for 100 businesses with up to a total of 2MW installed by December 2016.

### **Why are we doing it?**

We want business to save money, help reduce pollution and through their installation add to renewable energy capacity in Byron.

### **What do we want from you? What can we offer you?**

Please ask every business owner you know – including home-based businesses – to visit the 100 Go Solar website [www.100gosolar.com.au](http://www.100gosolar.com.au) to register for a free energy assessment; they'll go in the draw for great prizes when they've installed solar.
