

<b>Who we are</b>
C4CE is a national collaboration with over 60 member groups and heaps of individuals, a steering committee and a paid secretariat
<b>What and how are we doing it?</b>
We have been operating for over 3 years for three purposes 1. to support the community renewable sector with training, legal documentation and the like 2. to reform CwIth and State government policies to help community energy 3. to attract investment - from philanthropists and grants. We were instrumental in getting the NSW and Victorian grant schemes off the ground, and we're currently negotiating with a Federal agency on a \$3m fund for community start ups.
<b>Why are we doing it?</b>
(See above)
<b>What we want from you? What can we offer you?</b>
We have a neat website – <a href="http://www.c4ce.net.au">www.c4ce.net.au</a> with heaps of projects - with direct links to initiatives like ENOVA.  We ran the hugely successful 2014 Canberra Community Energy Conference and will run another in Melbourne late next year - every one invited of course.
