

Who we are
Community Owned Renewable Energy Lennox (COREL). A group of community members who are galvanising to work towards creating 100% renewable energy for Lennox Head.
What and how are we doing it?
<p>The newly formed group are currently meeting to discuss strategies and build relationships.</p> <p>Our first project is a community event, taking place on Lennox Beach 10.30am Sunday 29 November, when we join people all over the world for the People's Climate March as we walk together to demand action on climate as we approach the Paris Climate Conference (COP21). More info here: https://www.facebook.com/events/1483656828630833/.</p> <p>The group have entered into discussions with Ballina Shire Council for preferred sites for a pilot renewable energy project.</p>
Why are we doing it?
To take local action on climate change and reach our goal of creating 100% renewable energy for Lennox Head and be a part of the momentum building across the Country.
What we want from you? What can we offer you?
The group would benefit from start up funding for developing a strategy, confirming social license, group/organisation status and associated costs. Also, it may be of help to groups like ours to have a representative from NCEF who has relevant local government contacts and legislation knowledge to assist with mediating discussions with Council to overcome any barriers. We can offer a vibrant group of professionals in the Ballina Shire with shared vision and passion for creating community-owned renewable energy projects.
