

<b>Who we are</b>
Community-Owned Renewable Energy Mullumbimby (COREM)
<b>What and how are we doing it?</b>
Developing a donation-base 10kW PV project on Mullum Drill Hall and an investment-based project at Byron Shire Council's sewerage treatment works at Valences Rd. We are also exploring other options such as low-income housing and bulk purchase of PV/battery systems.
<b>Why are we doing it?</b>
To increase the amount of community-owned renewable energy in the region and keep profits from the projects in the region to develop more projects.
<b>What we want from you? What can we offer you?</b>
Come along and get involved. We have regular meetings where people can get involved in a variety of activities such as developing projects, community engagement, funding applications, social media etc.
