

Who we are
Enova Community Energy – Australia’s first community-owned renewable energy retailer.
What and how are we doing it?
Enova will buy and sell renewable energy; install, maintain and advise on renewable technology solutions (solar pv, storage etc); facilitate community renewable generation (e.g. COREM efforts); educate on energy efficiency; and through social benefit projects ensure the whole community can participate in the shift to renewables.
Why are we doing it?
We are a social enterprise set up to assist the community to reduce carbon emissions and the impact our current energy use makes on the environment; and to benefit the community, by helping grow renewable energy industry, by keeping our energy expenditure in the community, by creating jobs, and by ensuring lower socio-economic groups can also go renewable.
What we want from you? What can we offer you?
Become part of Enova now by investing - buying a share(s), sharing a share;and later switch to us as your supplier. We offer you the opportunity to become your own supplier and participate in developing a community based renewable energy industry in Australia.
