

Who we are
Byron Shire Council – Regional Electric Vehicle Strategy
What and how are we doing it?
<p>Byron Shire Council and Tweed City Council are co-funding the development of a Regional Electric Vehicle (EV) Strategy. This strategy will look at identifying and overcoming barriers to both Council and community uptake of EV.</p> <p>The key areas the strategy will be addressing are;</p> <ul style="list-style-type: none">- research into best practice worldwide and technical components relating to fast charging stations (how to make them completely renewable through connecting to PV)- Identify potential funding and research stakeholders- Design a regional strategy for the Northern Rivers including a local case study for the Byron Shire
Why are we doing it?
<p>We see EV's as a key component to reducing our greenhouse gas emissions and transitioning to a more sustainable transport system. By creating a strategy and consulting with stakeholders interested in creating this change with us we hope to facilitate a greater uptake of EV's in the Northern Rivers.</p>
What we want from you? What can we offer you?
<p>We are looking for research and funding partners for this project so if you are interested in getting involved please get in touch. Hopefully what we can offer you through the project is an increased level of public charging stations and access to affordable EV's in the Northern Rivers.</p> <p>Contact details:</p> <p>Sandi Middleton Sustainability Officer Byron Shire Council Sandi.middleton@byron.nsw.gov.au</p>
